"Intelligent Lighting for the 21st Century"

TerraLUX

www.TerraLUX.biz

In 1879 Thomas Edison gave
you the light bulb...

It lasted 40 hours

It broke

It gave you a sickly yellow light...

The MaxStar2 is shockproof, water resistant, and operates over a wide range of battery conditions making it a highly reliable partner to the working professional, -someone who demands the highest performance from his tools.

Why buy the MaxStar2?

If you own a MagLite flashlight you know the bulb quickly dims as the batteries age and the

In 2004 TerraLUX gave you the LED light bulb
to fit your Maglite®...

100,000 hr Lifetime!

Pure White Light!

Nearly Indestructible!

What is It?

The TerraLUX MaxStar2 is the brightest LED replacement solution for the highly reliable Mag C or D cell flashlights. This is not a few LEDs thrown into a flashlight. The MaxStar2 combines sophisticated electronics with Two Luxeon1® Emitters, giving you a total 50 Lumens of pure white light!

With a rated **100,000 hour life**, we can safely say you'll never need to replace the bulb. More importantly, the color **remains pure white** regardless of intensity due to the TerraLUX LightEngine, -electronics that keep the **light output constant**, regardless of the battery condition. You will get the last possible electron out of your batteries. If there is juice it WILL light!

light changes to a sickly orange color. Usually the bulb burns out after only a few sets of batteries. That's why there's a spare in the tail cap! With the MaxStar2 you get a reliable pure white light that is easy on your batteries. Even with the tremendous light output of this product your 3D cells will last through 20 hours of continuous use!

Focus with a Twist

TheMaxStar2 keeps the focusing ability built in to your Maglite. A quarter turn of the head changes the light pattern from a super bright central spot to a wide rectangular beam.
